

CAREER COMPASS

EVERY STUDENT. EVERY COMMUNITY.

2022-23

Our Services

✓ Individual College & Career Coaching (Grade 12)

Trained college & career coaches work one-on-one with high school seniors, equipping them with regionally-relevant workforce and post-secondary information. From exploring career options and FAFSA completion to test scheduling and college application preparation, our coaches complement your counseling staff and take students from uncertainty to confident action.

✓ College & Career Awareness Modules (Grades 6-11)

College & Career Awareness for every student in every grade with no additional staffing, no lesson planning, and no changes to student schedules! Even as early as middle school, students encounter obstacles that might prevent them from pursuing post-secondary education. This series of engaging, visually appealing, and grade-appropriate videos is custom-made for Louisiana students.

✓ Graduation Plan Assistance (Grades 8-11)

(ONLY AVAILABLE AS AN ADD-ON TO AWARENESS MODULES)

Developing and performing annual reviews of student Individual Graduation Plans (IGPs) in alignment with Bulletin 741 can be time-consuming. This service provides schools with a knowledgeable partner to create a seamless IGP process that exceeds the expectations of the state. The service includes collaboration meetings with a trained Career Compass staff member, customized digital activities for students including Jump Start information and college & career awareness, and data reporting dashboards for schools.

✓ Graduation Plan Mentoring (Grades 8-11)

(ONLY AVAILABLE AS AN ADD-ON TO AWARENESS MODULES OR GRADUATION PLAN ASSISTANCE)

Trained college & career coaches support 8th-11th grade students who need additional guidance during the process of course and diploma pathway selection. Students who are in need of extra support are identified by school administration, and trained coaches work with them throughout the year.

*Virtual coaching is also available for students who may not be on campus.
All materials can be modified to accommodate special populations.*
